

San Diego County Association of School Psychologists

The Neuropsychology of Emotional Disorders by Steven G. Feifer, D.Ed., NCSP, ABSNP

This workshop will explore the neural architecture of emotional behavior by examining various brain structures laying the foundation for higher level social skill functioning. Specific biological factors related to the development of social competence and emotional self-regulation will be explored. There will be a detailed discussion on bipolar disorders, anxiety disorders, and depression from a brain-based educational perspective, including cutting edge interventions such as neurofeedback. Schools can enhance emotional wellness in children through early prevention efforts, appropriate assessment strategies, and an improved school climate to foster emotional growth for all children.

Steven G. Feifer, D.Ed., NCSP is a nationally renowned speaker and author in the field of learning disabilities and emotional disorders, and has co-authored six books on learning disorders in children. He currently works at the Monocacy Neurodevelopmental Center in Frederick, MD, and is an adjunct professor at George Washington University, Philadelphia College of Osteopathic Medicine, and clinical supervisor in the ABSNP school neuropsychology training program. Dr. Feifer was voted the Maryland School Psychologist of the Year in 2008, and awarded the 2009 National School Psychologist of the Year.

Start Date: January 11, 2012
Event Time: 8:00 am - 4:00 pm

Alliant International University, Zable Hall
